Executive Summary

Cashtree has started to adopt blockchain-based technology to enhance the quality of our services for clients’ campaign performance, provide incentives that have economic value and can support the needs of Cashtree users and the community, and support the adoption of crypto and blockchain technology in Indonesia.

The Problem

- The digital marketing ecosystem is rapidly changing along with Google’s new privacy policy that restricts cross app tracking on Android limiting our platform’s movement.
- Web 3.0 and Blockchain industry in Indonesia are taking over the market and trends. Crypto products such as DeFi are still too complex and not user-friendly.
- Many existing projects in the crypto industry do not have the experience to convert traffic into revenue and possess immature business models which affect the adoption of the project’s tokens.

The Solution

Riding the waves of technological advancement, Cashtree’s new journey to Blockchain is opening the door to immense opportunity and will push Cashtree to win. Cashtree will be “The Gateway of Crypto Adoption”, pushing crypto & blockchain adoption in Indonesia to a new level. Cashtree will issue Cashtree Tokens (CTT) and will design the grant system for users or partners to benefit from Cashtree Business Ecosystem. CTT may also be redeemed for shopping vouchers with partner merchants to be used for shopping in Indonesia, becoming the real case study as utility tokens.

Highlights

- Exponential growth of Indonesia’s crypto investors (12.4 million per Feb 2022).
- Indonesia’s 1,222.8% crypto transaction growth in 2020 - 2021.
- The Digital Advertising Market in Indonesia reached $2.12 Bn in 2022 with YoY growth hitting 26.3% ($443 mil). While spending on Social Media Reached $ 900 mil (42.3% share), Programmatic spending is reached $1.69 Bn (79.7% share).
- It is expected that in 2026, 88% of ad spending will be via programmatic ads, and 69% ads spending is generated through mobile phones.

Why Cashtree?

Cashtree is the #1 and the most reliable advertising platform in Indonesia with over 20M user base (reward marketing model). With Cashtree’s long history and experienced team members in Indonesia, Cashtree has gathered comprehensive data in Indonesia. Through Cashtree data, the relationship among MAU, cashout, and revenue has been proved.

Cashtree can be particularly responsive to market demand and create differentiated products to customer needs with massive user base and experiences. Cashtree’s unique value propositions and strong competitive positions in the Indonesia market are enough conditions for Cashtree to be a emerging giant.

Success Keys

- Cashtree is connected to various DSP and SSP, a programmatic system for advertisers to purchase and manage ads inventories, that allows Cashtree to be able to convert traffic into revenue.
- Cashtree already has comprehensive data assets of networks, clients, partners, as well as owning a proven business model from Cashtree’s journey in Indonesia since 2016.
- Cashtree team is a solid team that acquired extensive know how from years of experiences in operating rewards based platform with up to 20 million users based in Indonesia.

Disclaimer : This document is the final version as of September 2023, with the possibility that changes or future developments may occur at any time. Cashtree may change and update the content of this Whitepaper from time to time. Readers are advised to always check for the latest updates of this Whitepaper document through the official Cashtree website.
Cashtree Overview

Cashtree is the **largest mobile advertising platform in Indonesia** which has become one of the most reliable platforms to connect brands and advertisers with users so that brands and advertisers can run various digital campaigns and users will receive reciprocity from advertisers' campaigns. Thanks to the first innovative digital rewards marketing platform model in Indonesia and the aggressive marketing strategy, this platform has grown to be the largest mobile advertising platform in Indonesia with unique user data.

From the user perspective, Cashtree has the vision to free users in Indonesia from the need for phone credit and contribute to the lives of its users, by giving rewards to users in the form of Cashtree Points which can be exchanged for credit and various other attractive prizes available on the Cashtree platform.

In line with our passion to provide the best service for clients and advertisers, continuously innovate and provide breakthroughs for the advertising technology industry in Indonesia, and our vision to share and contribute to the welfare of Cashtree users through economic and technological democratization, in 2022 **Cashtree has started to adopt blockchain-based technology** to support transparency in campaign performance for clients, provide incentives that have economic value and can support the needs of Cashtree users and the community, and in addition to supporting the adoption of blockchain technology in Indonesia.

Blockchain has changed the world and digital marketing is going to another universe. In addition, Google recently announced a new privacy policy restricting cross-app tracking on Android. All of them will change the digital marketing ecosystem and Cashtree will be a winner in these changes.

Cashtree’s plan to realize this mission is to build and expand the Cashtree ecosystem. Cashtree will introduce “Cashtree’s Grant Programs” to users and participants who contribute to build Cashtree ecosystem with CTT. The data will be recorded in the Blockchain Network. Advertisers will be able to make target marketing campaigns successfully and more efficiently in the Cashtree ecosystem. By introducing CTT, Cashtree aims to increase the utility value of Cashtree Token as a form of contribution that has broad economic value for Cashtree users and the community.

The strategy is to maximize the potential of blockchain to provide transparent campaign performance reports which will become a value proposition for Cashtree in the advertising technology industry in Indonesia, and provide contributions that have economic value for Cashtree users and the community for every participant in the Cashtree platform and campaigns.

Cashtree recognizes the issue of growth in the digital advertising industry that used to be dominated by advertisers/clients, publishers, and users; it is now crowded with many intermediaries, ad exchanges, and various cross-party data-sharing management platforms. This change causes users to experience multiple kinds of poor advertisement practices as well as privacy violations and losses on the advertisers/client-side due to rampant fraud and bot practices for various types of digital campaigns.

**Disclaimer**: This document is the final version as of September 2023, with the possibility that changes or future developments may occur at any time. Cashtree may change and update the content of this Whitepaper from time to time. Readers are advised to always check for the latest updates of this Whitepaper document through the official Cashtree website.
Cashtree Overview

Cashtree believes that the solution is a blockchain-based transparent advertising platform that can create a fair ecosystem that will be able to compensate users for every data and participation in each advertising campaign and provide transparent campaign results and performance towards clients/advertisers. Cashtree’s unique position as a mobile advertising platform company that adopts blockchain-based technology becomes crucial to creating fair conditions from the client/advertiser and user/user perspectives.

Cashtree: Centralized Ecosystem Challenges

During the years of Cashtree’s establishment, we have the vision to ease Indonesian citizens out of their daily needs for phone credit. To do so Cashtree aims to provide estimated cost saving of $4 per average user through discounts/phone credits availed through the Cashtree application. Cashtree’s highest generated Monthly Active Users (MAU) thus far is 4.3M. After careful consideration, we believe that adopting blockchain technology, therefore and creating a decentralized rewards system that can provide sustainable rewards of rewards to users is the best strategy to approach this issue.

Cashtree: The Gateway of Crypto Adoption in Indonesia

Cashtree believes that the world is vastly changing, and part of it is the blockchain that has taken over the financial industry by storm. Unfortunately, blockchain is still not widely or systematically understood. Many people in Indonesia either do not realize exactly how blockchain can help them, or do not understand how to start entering the crypto world. Through the Cashtree blockchain project, Cashtree is committed to be the “gateway” for crypto adoption in Indonesia, bringing users to the magnificent crypto world and even giving users a reason to adopt the blockchain and crypto ecosystem. Unlike crypto exchange where users still need to deposit their money as the capital to invest, buy, or even trade digital assets, Cashtree is basically award tokens to users in the form of rewards which are tradeable on crypto exchanges without requiring them to have an initial cash outlay and through our Cashtree application and the implementation of CTT in Cashtree Business Ecosystem. Users may subsequently convert their tokens for fiat or other forms of cryptocurrency via external exchanges. Using Cashtree, users can interact with the DeFi and crypto world in the most seamless and easiest way possible.

Disclaimer: This document is the final version as of September 2023, with the possibility that changes or future developments may occur at any time. Cashtree may change and update the content of this Whitepaper from time to time. Readers are advised to always check for the latest updates of this Whitepaper document through the official Cashtree website.
Cashtree Value Proposition

1) The first mobile advertising platform implemented blockchain technology in Indonesia:

Cashtree as a mobile advertising platform with a large user base certainly has the main asset, namely user attention. The innovation made by Cashtree is to develop a protocol that can track and record user attention and user participation for each campaign in the Cashtree application, as well as provide incentives for each user's participation. Cashtree appreciates every second of participation and contribution that users have given in supporting Cashtree. Later on, a form of incentive received by users is tokens.

2) Accelerate Crypto Adoption In Indonesia:

As the biggest mobile advertising platform in Indonesia with more than 20 million user base and 2 million MAU, Cashtree is in a very strategic position to push the acceleration of crypto adoption in Indonesia.

The most significant advantage that Cashtree brings to push the adoption is the ability to integrate crypto and blockchain technology into Cashtree platform most easily and conveniently to all Cashtree users. As simple as joining and participating in the campaigns available in Cashtree apps, users can earn a token with countless utilities.

This means that users can participate and interact with crypto without the need to spend anything but their attention and participation. This is even easier for users than other apps, such as crypto exchanges; users can buy, sell, and invest in many available cryptocurrencies but need to deposit money with a long KYC process.

3) Performance Reporting & Transparency:

Through using blockchain technology, all participation of Cashtree users for various campaigns by Cashtree's clients will be recorded on the blockchain and the system will provide transparent, real-time, real number reports to clients because of the blockchain characters that cannot be manipulated. This will increase the added value of trust for clients to use Cashtree. Cashtree upholds integrity and promises the best performance for clients.
Cashtree Value Proposition

4) Cashtree User Community:

The Cashtree Community is a powerful community spread throughout Indonesia. With the community’s support, Cashtree has experienced exponential growth from 2016 with an initial user base of 900,000 people and reaching over 20 million users in 2021.

5) Credibility and Trust:

Cashtree has been present in Indonesia since the end of 2015 until today to provide the best service for clients as well as users. Unlike most blockchain and cryptocurrency projects which often appear without clear credentials and identities, Cashtree is a company that was legally established and registered in Indonesia with crystal clear track record and real office address in Indonesia.

Success Keys

- Cashtree is connected to various DSP and SSP, a programmatic system for advertisers to purchase and manage ads inventories, that allows Cashtree to be able to convert traffic into revenue.
- Cashtree already has comprehensive data assets of networks, clients, partners, and a proven business model from Cashtree's journey in Indonesia since 2016.
- Cashtree team is a solid team that acquired extensive know how from years of experiences in operating rewards-based platform with up to 20 million user based in Indonesia.

Cashtree Token

CTT is the newly introduced incentives for users inside of the Cashtree application and Cashtree Business Ecosystem. CTT will be used along with Cashtree Point; our current incentives for users inside of the Cashtree application that can be exchanged with various rewards inside of the Cashtree application.

1. Cashtree Token on Mantle

The CTT project will be launched on top of the Mantle network, because of the benefits of the Mantle network, such as the security, openness, and the interoperability and scalability. Mantle network also has greater access to interoperable decentralized applications on diverse platforms, which will benefit Cashtree's further business expansion and future partnership plans. The Mantle Network is also known for its feasible gas fee, which is also an essential part for all the projects that want to enter the blockchain.

2. Cashtree Token (CTT)

CTT is a blockchain-based rewards system that provides vast benefits to users. CTT three main functions that users can enjoy, thus increasing the benefits that Cashtree presents towards users. These functionalities include exchange reward / incentives inside the Cashtree application and Cashtree Business Ecosystem, monetization through trading at exchange, extra benefits and special offers when using CTT on Cashtree partners channels.

Use cases of the Tokens

CTT will serve multiple primary use cases within the Cashtree application and Cashtree Business Ecosystem, aimed at enhancing user engagement, participation, and the overall user experience. These primary use cases are as follows:

(a) Exchanged for rewards within the Cashtree application: CTT serves as a means of exchange to obtain various rewards and incentives offered by partnering companies within the Cashtree Business Ecosystem. Users can utilize CTT to exchange them for rewards such as phone credits, vouchers, discounts, or other perks provided within the Cashtree application and its partner channels, which includes e-commerce platforms, telcos, and eating establishments. Certain rewards can be obtained directly on the Cashtree application, such as phone credits, or gifts, while other rewards may only be redeemable outside of the Cashtree application with partnering merchants linked to the Cashtree application.

Disclaimer: This document is the final version as of September 2023, with the possibility that changes or future developments may occur at any time. Cashtree may change and update the content of this Whitepaper from time to time. Readers are advised to always check for the latest updates of this WhitePaper document through the official Cashtree website.
Cashtree Token

(b) Used as a means of payment with certain partnering merchants: CTT can be converted into vouchers to be used for payment purposes with certain partnering merchants, such as Hotdeal, an e-commerce platform, with a discount given for CTT usage. CTT cannot be directly utilised by users as a means of payment. However, CTT will be available to be redeemed/exchanged for shopping vouchers within the Cashtree application for shopping with partner merchants. Such vouchers would first be directly acquired by Cashtree and users would subsequently be able to exchange their CTT for vouchers at a conversion rate which may be adjusted by Cashtree at our absolute discretion from time to time. The type of vouchers, and the availability and pricing of such vouchers are subject to variation from time to time.

(c) Used by advertisers to enhance engagement on the Cashtree application: Advertisers who are onboarded on the Cashtree application are able to set aside CTT as rewards for users who engage with their advertisements on the Cashtree application, incentivizing engagement.

(d) Tradeable on external cryptocurrency exchanges: CTT tokens can be used to trade on external cryptocurrency exchanges.

CTT may be obtained from the following means:

(a) Initial public and private sales: CTT can be obtained in initial public and private sales of CTT during Cashtree’s token generation event.

(b) Purchased on external cryptocurrency exchanges: CTT can be purchased on external cryptocurrency exchanges where CTT is listed.

(c) Distributed as user incentives under the Cashtree Grant Program: CTT will introduce a “Cashtree Grant Program” which rewards users who contribute to build the Cashtree application and Cashtree Business Ecosystem with CTT. When users engage or participate in campaigns from advertisers through the Cashtree application, they will earn rewards (currently Cashtree Point, but will be CTT once the token is implemented). Contributions from the users would include their engagement, attention, and time spent to do the campaign. CTT distributed to each user would be calculated based on the advertising budget from advertisers and their campaign objectives, and the CTT reward will be distributed from a pre-determined amount that has been set aside by Cashtree for such purposes as advertiser-linked initiative whereby rewards will be based on engagements with advertisers.

(d) Earned through participating in activities on the Cashtree application: Advertisers on the Cashtree application may incentivize advertising engagement by rewarding engaged users with CTT.
Cashtree Token

(e) Rewarded by partnering merchants: The CTT application will make arrangements with a number of partnering merchants such as Poppang (a retail F&B company) and Lagsan (a online blogging/advertising platform) where CTT can be obtained for making purchases or contributions with those partnering merchants. Cashtree has already allocated tokens for partners that will be implementing CTT into their services. Participating partners will join the Cashtree Business Ecosystem. Cashtree will provide CTT to the participating partners after relevant discussions and negotiation. Subsequently, the participating partner shall manage the amount they wish to incentivize their users using CTT/distribute CTT following an agreement between Cashtree and the participating partners. (f) Conversion from CP: The CTT application will convert CP to CTT at predetermined rates on the application of users.

Other features of CTT

1. CTT cannot be redeemed or sold to Cashtree in exchange for fiat or other forms of cryptocurrencies.
2. A holder of CTT, by virtue of owning CTT, will not have any direct or indirect ownership of the assets of Cashtree, nor any rights to the profit or revenue generated by the Cashtree application or Cashtree.
3. CTT does not grant any voting rights in the operations or management of either the Cashtree application or Cashtree.

Cashtree Token

3. How Much CTT Can Be Earned By Users?

CTT as user incentives will be distributed periodically for 60 months. Cashtree is projecting to increase DAU & MAU each year, based on this projection we expect that the Cashtree adoption is going to keep increasing, which will consequently increase the demand for CTT. Certain amount of CTT will be set aside in treasury at the token generation event and released over time to users in the form of rewards. The total quantity of CTT to be released at any time will be based on the overall ecosystem traffic (DAU & MAU) as a higher traffic will also result in more users earning rewards.

Below is the projection of how much CTT each average user can expect to be rewarded for typical platform contributions along with the target projection of MAU growth yearly (2023 - 2028). The early adopters will be benefited the most since they can earn more CTT than the users that join Cashtree later.

With the possibility that demand for CTT can keep increasing, the potential economic benefit users will also multiply.

4. Cashtree Rewards Model: Cashtree Point & Cashtree Token (CTT)

Cashtree Point is a form of user incentive that will be given to the users for each of their contributions on the campaigns from advertisers, which then can be exchanged into various rewards available inside of Cashtree application and has been used since the day 1 of Cashtree business. Now, Cashtree is entering the blockchain and will release a new incentive in the form of CTT.

Entering the blockchain world, Cashtree understands the transition period will be challenging as most Cashtree users are already familiar with the current reward system that mainly focuses on giving away phone credit and rushing transition will risk decreasing DAU & MAU within the Cashtree application. Derived from stated concerns, Cashtree decided to implement the two token systems, a combination of Cashtree Points & CTT as a joint incentive for users.

Disclaimer: This document is the final version as of September 2023, with the possibility that changes or future developments may occur at any time. Cashtree may change and update the content of this Whitepaper from time to time. Readers are advised to always check for the latest updates of this Whitepaper document through the official Cashtree website.
Cashtree Point is an off-chain token that users can earn for their contributions to the campaigns from advertisers. These tokens can be exchanged for various rewards within the Cashtree application, such as vouchers, discounts, or other perks. Cashtree Point is essentially a loyalty point system that the Cashtree application users can earn by participating in advertising campaigns. The more active a user is on the Cashtree application, the more CP they can accumulate.

These points can be exchanged for various rewards within the Cashtree application, such as vouchers, discounts, or other perks. Cashtree plans to replace Cashtree Point partially with CTT which constitutes an on-chain utility token due to its several advantages. However, Cashtree Point will not be entirely replaced by CTT immediately and Cashtree will implement a dual token system where Cashtree Point will be the loyalty point users will receive and they will have the option to redeem the Tokens using Cashtree Point. In the long term, Cashtree intends to promote the transition of all Cashtree Point to CTT by reducing the use case of Cashtree Point solely to convert to CTT.

Disclaimer: This document is the final version as of September 2023, with the possibility that changes or future developments may occur at any time. Cashtree may change and update the content of this Whitepaper from time to time. Readers are advised to always check for the latest updates of this Whitepaper document through the official Cashtree website.
In a way, Cashtree Point and CTT is a token system, even though Cashtree Point is more as off-chain token and only available as reward incentive inside Cashtree apps, and CTT as the on-chain crypto and utility token.

Cashtree Point will still exist in the Cashtree application, and still can be exchanged into rewards available in the Cashtree application such as Phone Credits, e-Wallet credits, vouchers, etc. However, after 2 years period of transition, Cashtree Point will only be available to be redeemed into CTT.

Cashtree Point is one of the tools to help maintaining and controlling inflation rate of CTT.

Cashtree prioritizes the development of CTT's function so that it can provide more benefits for users. This means CTT's functions are not limited to being exchanged for rewards available on the Cashtree platform but across all products and partners in the Cashtree ecosystem, including:

1. Exchange for shopping vouchers and offers at Hotdeal Indonesia (video commerce platform)
2. Exchange for shopping vouchers and offers at Poppang, a cafe (retail) that sells Korean-style snacks
3. Soon more function and collaboration with partners to give more benefits for users will be added continuously.

Implementation of Cashtree Token (CTT) and Cashtree Point inside Cashtree App

Once Cashtree implemented Cashtree Token, during transition periods Users can also exchange Cashtree Point to Cashtree Token that will be available together with other rewards in Cashtree app.

Disclaimer: This document is the final version as of September 2023, with the possibility that changes or future developments may occur at any time. Cashtree may change and update the content of this Whitepaper from time to time. Readers are advised to always check for the latest updates of this Whitepaper document through the official Cashtree website.
6. Comparison of Cashtree Point & Cashtree Token

<table>
<thead>
<tr>
<th>Cashtree Points</th>
<th>Cashtree Token</th>
</tr>
</thead>
<tbody>
<tr>
<td>Limited Rewards / Prize Stock Inside Cashtree Apps</td>
<td>Cashtree Token can be used in wider and broader ecosystem inside Cashtree Business Ecosystem. With various partners and merchants that will be available inside Cashtree Business Ecosystem, Users will have limitless and various benefits of Cashtree Token</td>
</tr>
<tr>
<td>Cannot monetize rewards</td>
<td>Cashtree Token can be monetised and traded in exchanges. However the full benefits can be experienced by the users and holders by using Cashtree Token inside Cashtree Business Ecosystem, where Cashtree Token not only can be used to be exchanged with rewards and products with special price in the ecosystem, but also comes with extra benefits</td>
</tr>
<tr>
<td>Limited Function (only can be used inside Cashtree app to be exchanged with rewards)</td>
<td>Cashtree Token offers more functionality. Not only as a rewards that can be exchanged for various benefits and offers inside Cashtree Business Ecosystem.</td>
</tr>
</tbody>
</table>

Cashtree Point VS Cashtree Token Comparison

7. Cashtree Mission To Earn

The users who will complete various missions will get more Cashtree Points to change into CTT. Missions will be composed to meet a variety of demands for ESG (Environment, Social and Governance) and Cashtree’s clients. The conversion of Cashtree Points to CTT will be controlled to keep the price through various mechanisms and Clients can donate CTT and pay the related fee with CTT for these missions.

Along with the process of transition towards blockchain, Cashtree will implement new rules and regulations that will help manage the inflation of Cashtree Points, and also help the transition go smoothly for the users and the company. During transitioning to the blockchain, Cashtree will announce and implement new rules and regulations, including but not limited to:

1. Cashtree points automatically reset to 0 if you do not log in to the user’s account for 3 months
   There will be a daily redemption limit from Cashtree Points to CTT.
2. Cashtree Points have a 1-year expiration date, if points are not redeemed they will
   automatically reset to 0 Cashtree point
3. Benefits such as phone credit, e-money, etc. will continue to be provided as an option to
   redeem Cashtree Points for at least 2 years forward, but in the future, Cashtree aims for 100% token redemption so that Cashtree Point can only be redeemed into CTT.

9. Cashtree Token & Application Security

The Cashtree’s team is taking the security of CTT and Cashtree application with all due diligence. Cybercrime is overwhelming the world, and the crypto space is not untouched. Users and companies of this new ecosystem can profit fast; however, they can lose even faster due to cyber attacks on blockchains and crypto wallets.

CTT is developed with security in mind and applies security in every part of the crypto ecosystem:

1. Smart Contract for CTT is developed following the secure development lifecycle, audited by a recognized security firm, and launched in a reliable blockchain network, Mantle, following its hybrid security model.
2. CTT is provided through a reliable crypto exchange, which demands the highest standards of security.
3. Cashtree application, which stores CTT, is built with the security best practices to prevent data leaks and fraud.
Cashtree Business Ecosystem

Cashtree Business Ecosystem realizes Cashtree's vision to expand its business as a global company and provide more comprehensive benefits to Cashtree users. Focusing on Indonesia as our core market, Cashtree has prepared every step and strategy to scale up to the global stage. The development of the business ecosystem is essential to make Cashtree a sustainable business and provides the prospect of a multi-industry function for the CTT.

1. Introduction To Cashtree Business Ecosystem

Cashtree Business Ecosystem is a blockchain-based digital ecosystem where Cashtree is the driving axis for various entities and business units within the ecosystem. The main focus of Customer & User-Centric, Cashtree Ecosystem will redefine the meaning of an entertainment platform. The Cashtree Ecosystem will be filled with various complementary entities, including reward & entertainment platforms, video commerce, F&B (cafes), P2E Games, Defi Social Platforms, and a variety of future developments.

Cashtree Clients

and so many more..

Cashtree Business Ecosystem

The Cashtree Ecosystem will showcase the potential adaptation of blockchain and cryptocurrency technology onto the main Cashtree platform, which will provide economic value not only within the Cashtree ecosystem but also to generally connect and enrich the lives of Cashtree users and the wider community in Indonesia and globally.

1) Hotdeal.id : Video Commerce Platform

Hotdeal (www.hotdeal.id) is a new e-commerce platform that utilizes video as the main communication medium for users. Hotdeal is determined to provide users with an immersive video shopping experience and become the first video commerce platform in Indonesia.

Currently, Hotdeal has more than 15 merchants and 20+ brands with 50+ products from various categories such as health, beauty, and F&B and will continue to grow in the future. CTT can be used in Hotdeal to be exchanged for discount vouchers or other discounted which later can be used to shop at Hotdeal.
Lagsan introduces a model where creators and contributors can share their work and earn incentives from works published on this platform. The incentive received for contributors is a digital asset (cryptocurrency) called CTT which has not only economic value for contributors, but also has various functions within the Cashtree Business Ecosystem.

Lagsan prioritizes the experience of sharing stories between users and contributors from various fields and backgrounds that are dynamic and mutually supportive and uphold the authenticity of the contributors' work. Lagsan believes that important ideas and works will drive future generations.

The incentive received for contributors is a digital asset (cryptocurrency) called CTT which has not only economic value for contributors, but also has various functions within the Cashtree Business Ecosystem.
Cashtree Business Ecosystem

Write, Share, and Earn Model

Contributors who create and publish stories or work through the Lagsan platform will receive incentives in the form of CTT that can be withdrawn and traded on crypto exchanges that have listed CTT on their platform.

Lagsan will provide incentives with fair calculations for contributors, which are taken from revenue sharing between Lagsan and contributors for every traffic and reading time of each of their works and articles. Lagsan revenue aside from the traffic generated, also coming from premium article and ads placement.

Lagsan introduces a model where creators and contributors can share their work and earn incentives from works published on this platform. The incentive received for contributors is a digital asset (cryptocurrency) called CTT which not only has economic value for contributors, but also has various functions within the Cashtree Business Ecosystem.

3) P2E Games (Play To Earn)

Cashtree will work alongside game studios in Indonesia to then develop P2E Games in the Cashtree Ecosystem. Because it cannot be denied that games are a very attractive medium for users. By providing P2E Games in the Cashtree Application, Cashtree will be able to manifest itself as the main platform for entertainment and mobile advertising that provides benefits to its users.

4) Poppang : Korean Snack F&B Cafe

Poppang is the new player in F&B market in Jakarta. This cafe sells Korean most popular snacks and street foods with a contemporary twist and concept. Poppang’s first store is located in the most sophisticated and right in the heart of the business district in Jakarta, ASHTA District 8 @ SCBD. Today, Poppang has opened two new stores in Grand Metropolitan Mall Bekasi and Lippo Mall Puri Indah, West Jakarta.

In 2023, Poppang will open 11 new stores totalling up to 13 stores in 5 cities in Indonesia. In 2024, Poppang will open for franchising, aiming to expand its business, reaching 50 outlets in Indonesia. In 2025, Poppang is aiming to open a total of 100 outlets.
Implementing CTT to Poppang will benefit users with special discount vouchers to shop on Poppang Store, and also Users can receive CTT cashback for each purchase of Poppang products.

The use case of CTT implementation in Poppang is a showcase of the promising collaboration between CTT and retail players in different industries, and will open the door to upcoming partnerships with other sectors and partners, such as restaurants, food delivery services, etc.

5) Cashtree’s Future Partners

Cashtree’s commitment remains to deliver the best service of entertainment to Cashtree’s users. To do so, Cashtree will collaborate with diverse partners to enable our users access to various content and activities.

“We will give additional meaningful benefits to advertisers that will pay a considerable portion of fee through CTT.”

6) Cashtree Goes Global

Cashtree will soon be available for global audiences and markets, bringing Cashtree services to advertisers and clients, and entertainment for global audiences.

With it, CTT will reach global users with strategic partnerships and collaborations with brands and companies to embody the benefits and utility of CTT for Cashtree users and CTT holders.
Cashtree Business Ecosystem

Cashtree App will be available globally

Cashtree will open its services globally, helping brands & clients to advertise their products and services and bringing benefits and entertainment to more users.

CTT : Global Reach

CTT will build partnerships with various brands & companies all around the world to bring benefits to CTT users & hodlers!
Future Development

For the first 24 months since the implementation of Cashtree blockchain project and CTT, Cashtree will focus on accelerating the crypto adoption to all of Cashtree users by increasing the DAU / MAU, and also reacquisition of all Cashtree users. Together with this, Cashtree will start to distribute the CTT as a reward. Cashtree will also explore the IDO opportunities to make CTT available for early adopters, bringing benefits of Cashtree Business Ecosystem. After that, Cashtree is aiming to join a Launchpad program with the objective to have CTT listed on the global and Indonesian exchange.

On the Cashtree Business Ecosystem, the development of products and services will keep going. Implementation and integration of CTT into Cashtree other products and partners such as Lagsan, Hotdeal, and Poppang is the starting point.

In the third year of the project, Cashtree will build Dapps and make Cashtree fully run on the blockchain, becoming the first mobile advertising platform in Indonesia to implement crypto and blockchain technology. Cashtree will also build partnerships with various partners that will bring benefits for Cashtree users and add value to Cashtree Business Ecosystem, and expand the utility of CTT even more.

We aim to reach product finalization by early 2026 and by that time, Cashtree will dominate the Indonesian market. Furthermore, Cashtree will expand the business and push the adoption of CTT by opening the mobile advertising platform service for global clients, starting with neighboring countries in SouthEast Asia, and will soon be expanding globally.

Continuously, Cashtree will keep on expanding the business and partnerships with all partners, merchants, and platforms to give more value added services and expand the use of CTT in Indonesia for the first phase, and later on with global brands and partners.

In summary, Cashtree is and will be the pioneer in digital marketing in Southeast Asia.

Roadmap

Phase 1

DAU & MAU, Reacquisition

Cashtree is introducing blockchain to its users through Cashtree Token. In this first phase, Cashtree will start with Token Generation Event, building CTT utility in Cashtree Business Ecosystem and aiming for Listing on a major Exchange.

For the first 24 months since the Cashtree blockchain project and CTT implementation, Cashtree will focus on accelerating the crypto adoption to all of Cashtree users by increasing the DAU / MAU, and also reacquisition of all Cashtree users. With this, Cashtree will start distributing the CTT as a reward. Cashtree will also explore the IDO opportunities to make CTT available for early adopters, benefitting Cashtree Business Ecosystem. After that, Cashtree aims to join a Launchpad program to have Cashtree Token listed on Indonesian exchanges.

The focus of Phase 1 is to increase DAU & MAU and also reacquisition of Cashtree users, along with building the MVP of Cashtree and Cashtree ecosystem especially Cashtree Apps and Hotdeal platform, and expanding the utility of Cashtree Token.

Our strategy is to have CTT available to the public and listed in a global exchange. We are also exploring doing an IDO before joining a Launchpad. With Cashtree track record and huge user base, the listing and IDO process should be a mutual collaboration between Cashtree, the DEX for IDO, and CEX where CTT will be listed.

DAU & MAU Reacquisition Plans:

- Introducing and implementing CTT into Cashtree Apps
- Social Media Management
- Media Coverage & PR Activities
- Community Channels:
  - Official Telegram Channels
  - Official Discord Channels
  - Official SNS Channels

Whitepaper

Development: CTT

Pre-Sales / Private Sales Periods

Integration with Hotdeal (ecommerce platform) where CTT can be used to buy special discount vouchers to shop in Hotdeal.
Integration with Poppang (F&B retail cafe) where CTT can be used to buy special discount voucher and special priced product bundling

Integration with LAGSAN platform.
Lagsan Contributors who create and publish stories and/or works through the Lagsan platform will receive incentives in the form of CTT

Listing @ Indonesia Exchange:
Public Sales Period

Q1 2023 - Q2 2023

Events Online: AMA, Airdrop, Giveaway, Quiz
Events Offline: Joining blockchain & crypto conferences and seminar events in Indonesia
